## INTRODUCTION:-

In Recent days we Know that there is Pandemic Period going due to Covid-19. It is a very Curious Time for every one. No one can go Outside. Everyone know that if we Go outside everyone will effected by Corona virus. In this Pandemic period many Offline Activitis are closed. So we will make an Application/website to take a Vote of all people by online Voting system. Through this we can easily collected all vote of people. By online process.

In busniness , markets, mall , shopping complex, Service center, survey, Feedback etc. All this things we done by online process.

So we will focus on E-Voting System. It help to analysis the all review given by all people. To make our company and business will Growth. It easy to analysis that our business and company are in profit or loss. By all people review.

## Modules:

- **Login:** - This module enables the user and admin to login to the system by entering id and password.
- **Registration:** - In this module the admin will verify the user and register the user who will vote.

- **Verify :-** If there is any security vote is going on all people must have verify there addhar card , Pan card or other ID proof .
- **Selection :-** we can arrange the candidate by order it will easy to give vote by Systematic order.
- **Fingerprint Verification:** - The authenticated user can vote for the candidate for one time for a particular voting
- **Face Recognition:-** It help to give vote if there is security required by matching the face from Id card.
- **Result:** - Admin and user can view the result given by all people

### **Software Requirements:**

- Android Studio
- Visual studio 2010
- SQL 2008 (Database store)
- Windows 7 or higher

### **Hardware Components:**

- Processor – i3, i5
- Hard Disk – 5 GB
- Memory – 1GB RAM

### **Advantages:**

- Easy to collected all review
- Easy to shift business on public demand
- Easily take feedback

### **Disadvantages:**

- Must use any online device or online Platform
- Required Phone and Laptop/desktop.

### **Applications:**

Through E- voting System we can easily take review by all people . In any field

Its help to our Busniess in Profit. After knowing all review we know what demand on the market. We can easily shift our business in public demand.
